

Module 3: R basic

2024-02-05

Loading

```
data(trees)
```

Print the first 6 rows

```
head(trees)
```

```
##   Girth Height Volume
## 1   8.3     70   10.3
## 2   8.6     65   10.3
## 3   8.8     63   10.2
## 4  10.5     72   16.4
## 5  10.7     81   18.8
## 6  10.8     83   19.7
```

1. Using the 'nrow()' command, how many rows does the data.frame have?
2. Using the 'ncol()' command, how many columns are there in the trees dataset?
